Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's election without traverse of the species of Figures 1-4 and 5A-5D in the reply filed on 6/9/05 is acknowledged.

Claims 18-32, 48 and 49 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species of the invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 6/9/05.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 and 33-36 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Barker.

Claims 1-4, 7-12, 15-17, 33-36, 39-44 and 47 are rejected under 35 U.S.C. 102(e) as being anticipated by Yoshikawa et al..

The patent to Yoshikawa et al. discloses a star tracker 1 and 11 that can track the sun. The trackers 1 and 11 search for light and identify the electromagnetic radiation from the sun and stars to identify their position by first looking through tracker 1 and then predicting the view of tracker 11 at a slightly later time and comparing the 2

images. This requires knowing the recited relationships between the 2 trackers 1 and 11.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5, 6, 37 and 38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshikawa et al..

The patent to yoshikawa lacks the recitation that the star trackers are photodiodes. This is considered an obvious form of an optical tracker and the examiner takes official notice to this fact. This would be obvious in order to sense the intensity of the stars radiation.

Claims 13, 14, 45 and 46 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
